MESSAGE FROM THE COUNTRY DIRECTOR

It's my pleasure to present for you end of year report, despite the fact that there is a lock down.

We lost millions of people across the world, our sponsors were greatly affected, some lost their jobs, business collapsed and still many are dying. But we thank God that our sponsors did all it takes to ensure that our organization is funded throughout the year.

Our programmes continued running and tremendous achievements were made such as

School programmes, construction of classrooms, staff houses, medical attention for our children, staff salaries and many more in the year 2020.

Thank you all for your struggles.

ELAMU MUSA

LIFE FOR ALL UGANGA -NGO.

Who we are?

The idea of Life for All comes from the simple believe, that everyone has a right to live a good life. Our founding members where so deeply touched by poverty of the people in some parts of Uganda, that they have been active since 2008. We support people, especially children in Uganda who have a very small or no chance to survive without help. We are convinced that when people get trained how to help themselves by using their individual talents, it will be a way out of trouble for many now and in the future.

OUR GOALS

Actively improve the quality of life

Sustainable help for body and soul

Helping people help them selves

Education for children and adults

SCHOOL

Equipping children with literacy, numeracy and life skills,

146 children were able to start studies very well in January, after a lock down, we were able to meet our children class each day, give learning materials, questions, corrections were done and we were able to cover what was required for them.

Medical

Life For All usually refer sick children to a clinic in bweyale for treatment where we meet the bills, we are grateful to announce that we were able to offer medical attention to our children despite the fact that they were in their homes. The team was able to visit, care takers report any kind of sickness to the responsible person and treatment is given to our children. We are very grateful for our reduced cases of typhoid due to clean water we got through both borehole and the filter has reduced typhoid almost to zero.

CLEAN WATER

Life for all received donations and Draco company constructed a borehole up to 75metres.there is enough water that can be motorized in future, but at the moment we are using water pump. Our water is clean as per the national water testing report. thank you for your generous donations.

We also thank we-water organization for donating a water filter to life for all. It's still helping us a lot as our water is filtered and this has reduced water born related diseases

NEIGHBOURHOOD PROJECT

The number of beneficiaries has increased to 98 families benefiting 566 people from the project, including children and other family members.

Many of our beneficiaries now grow crops such as cassava, beans, sweet potatoes, groundnuts, maize, others have extended it out side life for all ground due to increased number of beneficiaries. In 2020, we gave out 1316 kg of beans for seed,3012 kgs of maize to the beneficiaries.

Project beneficiaries were able to cultivate 28 bags of maize, three acres of cassava for feeding our children, out of which we gave 2600kgs to our beneficiaries due to shortage of food to feed

CONSTRUCTION

We are grateful to have a single classroom for our children; this is helping to accommodate p1 to p5 classes as they wait for their classroom block.

The purpose for this houses was to help work as class rooms for children due to shortage of class rooms .our children were using store as their class room which was not good for their health and not conducive for their leaning .we are grateful that four round houses were constructed and now we have shifted four classes there. We continue to pray that God help us have a long classroom block for primary school that will be able to accommodate the primary children.

We now have nine round houses ,acting as kitchen, baby class, middle class, top class,p1,p2,p3,p4,p5,one room is being split into two to act as the a house where our children that are suffering from their homes are going to be staying as we wait for the dormitory.

We were also able to construct staff house with four rooms to accommodate staff due to increased cost of rent. Life For All is grateful to announce that 4 rooms have been constructed and this will occupy four of our staff.

Many of our staff have been renting outside, there was need and it's a requirement that the organization provides for them accommodation allowance which is high due to high cost of rent. It was also not safe for the staff to rent outside due to a challenge of theft of their property when at work, they also have young children that need to attend school ,these are some the reasons why it was necessary for the staff to have rooms to accommodate them

The rooms are going to accommodate the garden team .

FOOD RELIEF

During a lock down, children barely had nothing to eat as a meal, I am very pleased with our sponsors that stood with us during the difficult time up to date. families were able to receive a package several

times that included food, soap for washing hands and clothes and other help.

Child sponsorship

We have registered 146 children; more than 50 children now have their direct sponsors and the rest are still waiting for their sponsors. Our children were able to write letters to their sponsors, they also receive letters from sponsors.

During the course of the year, the team visited their homes, deliver food relief and checking on their health, those that were found sick were always taken for treatment and we are grateful that they attended, took home learning materials during the lock down. Thank you sponsors for

CHRISTMAS GIFTS

It's my pleasure to thank all our sponsors that all your gifts arrived, we delivered them to our children. We realized that some of our children were lacking clothes to wear, as care takers were

struggling to look for food with others concentrating in helping their own children due to lack of enough money to take care of all of them. we received donations and clothes were bought for the children. Each child was able to take at least 2 to 3 pairs of clothes .

We also thank our partner organization LAFMAAL for sponsoring children's children party for 2020. GOD bless you.

FINANCE

I am very grateful to all our funders; we were able to fund all the activities with your donations.

And here is a copy of our financial statement.
